

Welcome to Graduate Medical Education at Tulane University School of Medicine. We are extremely proud of the training opportunities offered by this health sciences center. Collectively, we have twenty residency and twenty-four fellowship programs. The goal of this GME office, in conjunction with our fourteen affiliated training institutions, is to provide an excellent basis for postgraduate education by offering comprehensive clinical and research programs, didactics and supervision in the care of our patients. While in residency at Tulane skills are developed which equip our graduates for a lifetime of learning, professional advancement, and quality patient outcomes.

Our physicians-in-training are encouraged to develop their knowledge, skills and judgment to the maximum potential while at the same time meeting and exceeding the goals and objectives of their respective programs. Tulane residents and fellows are exposed to a rich academic environment which is designed to foster careers as contemporary clinical investigators, teachers, and practitioners of the medical arts and sciences.

After reviewing this site, it is our hope that you will consider one of our outstanding training programs. Give Tulane a chance to become a part of your future and you will also become a part of our 170 year history in medical excellence.

Jeffrey G. Wiese, MD, FACS  
Associate Dean for  
Graduate Medical Education
