

Laboratory Ergonomics

The following websites offer basic information and recommendations on laboratory ergonomic safety. Please note that while the Tulane University Office of Environmental Health & Safety (OEHS) recognizes the OSHA and CDC sites as acceptable for providing ergonomic information, some of the information that is provided at those sites does not necessarily reflect the ergonomic policies and procedures in place at Tulane University. If you have any questions after you have visited any of the listed sites, please call the OEHS at (504) 988-5486. Also, please call the OEHS for specific inquiries or requests for surveys related to laboratory, office, computer workstations or industrial ergonomics.
